**EXAMINER'S AMENDMENT** ✓

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 11-20.

2. The following is an examiner's statement of reasons for allowance: ✓

After careful study of the amended claims, the previously applied reference to Polinski (US Patent No. 5,386,339) and applicant's analysis presented on page 9 and 10 of the response filed on July 11, 2007, the examiner concluded that the modified structure of Polinski does not disclose the structure claimed by the applicant in the base claims 1 and 10. To be specific:

Regarding claims 1-9: the patentability resides in the limitations "each first ceramic layer consisting essentially of low thermal conductivity, electrically-nonconductive materials," and "the second region being formed of at least one second ceramic layer containing thermally-conductive particles dispersed in a matrix comprising electrically-nonconductive materials, the thermally-conductive particles having a higher coefficient of thermal conductivity than the electrically-nonconductive materials of the first and second ceramic layers" in combination with other claimed limitations of the base claim 1.

Regarding claim 10: the patentability resides in the limitations "each first ceramic layer consisting essentially of low thermal conductivity, electrically-nonconductive glass and ceramic materials," and "the second region being formed of second ceramic layers contain thermally-conductive particles dispersed in a matrix comprising electrically-nonconductive glass and ceramic materials, the thermally-conductive particles having a higher coefficient of thermal conductivity than the electrically-nonconductive glass ceramic materials of the first and second ceramic layers" in combination with other claimed limitations of the base claim 10.

The prior art of record, taken alone or in combination does not fairly teach or suggest all the limitations or the structure arranged in the manner as claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claim 5, previously withdrawn from consideration as a result of a restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104, as it directly depend and include all the limitations of allowable claim 1.

Because **all the product claims of group I**, previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the specie restriction

**requirement as set forth in the Office action mailed on October 31, 2005 is hereby withdrawn.** In view of the withdrawal of the specie restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
